HELLO THERE!

LINDSAY SHELTON

She/her | Application
Programmer

@lshelton_tech | lindsaytshelton.com | linktr.ee/lindsaytshelton

Born and raised in Kansas City metro area

Proud cat mom and Bravo enthusiast

BizApps MVP and MCT

Spent 10 years as a teacher before switching careers

Works with everything from Power Platform
adoption/governance to SPFx web parts to Azure APIM to
Microsoft Shifts

AGENDA

- Lindsay's path from zero to governance
- Four Pillars of Governance
 - Environments
 - DLP policies
 - Security Roles
 - Center of Excellence Starter Kit
- Tips and Tricks

FLASH BACK TO SEPTEMBER 2022...

Lindsay arrives home from
the first inaugural Microsoft
Power Platform Conference

FLASH BACK TO OCTOBER 2022...

Lindsay logs into her work computer, does some research, and begins to react in horror as she realizes that there's a zero state of governance in her organization

WHAT IS A ZERO STATE OF GOVERNANCE?

ZERO STATE OF GOVERNANCE

SHADOW IT

Power users could be creating mission-critical items that IT knows nothing about; excessive use of resources like licenses

A MESS!

Users who leave are creating orphaned flows and apps; wild creation of environments and apps

SECURITY CONCERN

Sensitive company data could be leaking through unvetted connectors; people could be accessing apps that you don't want

STOWERS INSTITUTE FOR MEDICAL RESEARCH

- Medical research non-profit
- 600ish users
- Somewhat Microsoft reluctant, depending on the lab or department

Stowers
Institute

SO, WHAT WAS GOING ON AT STOWERS?

SHADOW IT

The biggest problem we had, and we didn't know it until months after the primary power user had left

A MESS!

Only a handful of orphaned apps and flows, but no way to help users when someone left without off-boarding

SECURITY CONCERN

Luckily, there were no leaks that we know of, though this was probably only due to low adoption

**WHERE DO YOU GO
WHEN THERE'S
NOTHING IN
PLACE?**

Anywhere you want!

yo dawg,i heard you like governance

A black and white photograph of Morgan Freeman laughing heartily. He has his eyes closed and is smiling broadly, showing his teeth. He is wearing a dark, collared shirt. The background is a soft-focus indoor setting.

so I put some governance
in your governance, so you can
governance while you governance

HOW I GOT STARTED

MICHAEL ROTH (WHO HELPED
ME MAKE THIS PRESENTATION)
[@michaelroth42](https://twitter.com/michaelroth42)

CRAIG WHITE
[@platformspower](https://twitter.com/platformspower)

TWITTER
[#SharingIsCaring](https://twitter.com/hashtag/SharingIsCaring)

MICROSOFT LEARN
No, really!

BIGGEST SOURCE OF HELP - THE COMMUNITY!

- Don't be afraid to ask and reach out to people!
- You aren't a burden and people want to help.
- Pay it forward once you've been helped.

THE COMMUNITY COMING TO HELP ME

LINDSAY'S GOVERNANCE PHILOSOPHY

- After governance is in place... Empower users to create by encouraging adoption
- Allow your dedicated/trained makers a bit more freedom with DLP policies
- Develop relationships with your power users; they can become your evangelists
- Users can't break anything or screw anything up too badly with good governance
- Better to be safe than sorry

FOUR PILLARS OF GOVERNANCE

ENVIRONMENTS

DATA LOSS
PREVENTION (DLP)

SECURITY ROLES

CENTER OF
EXCELLENCE

ENVIRONMENTS

Space to store and manage data, apps, flows and keep them separated from each other

Basically, big boxes

Default

North America

Europe

Production

💡 That's the foundation of ALM (Application Lifecycle Management)

ENVIRONMENT TYPES

	DATAVERSE FOR TEAMS	A "mini-database" right inside Teams, where you can store data. It's a simplified version of the full Dataverse
	DEVELOPER	Intended for use only by the owner; security groups can't be assigned to dev env
	PRODUCTION	Intended for permanent work in an org; use for business-critical solutions
	SANDBOX	Non-prod but can be used for dev and test; run just a little slower than a prod environment
	TRIAL	For short-term testing, expire after 30 days; limited to 1 per user

the Default environment

CONSIDER T-SHIRT SIZING

Courtesy of Craig White

THE DEFAULT ENVIRONMENT

- Can't be deleted
- Can't back it up or properly restore it
- Recommendation is to rename it from "Org name (default)" to "Personal Productivity" or "Contoso Productivity" so users know it isn't a private environment
- Use a strict DLP policy on your default environment
- Use the CoE Starter Kit to clean up orphaned and inactive flows and apps
- Use the CoE Starter Kit to identify flows and apps that are popular to the point of becoming business-critical

WHAT ARE DATA LOSS PREVENTION (DLP) POLICIES?

- Rules that you can set up that block or permit certain data connectors
- You can set new connectors to be blocked by default!
- Can also govern which connectors can be used together
- Can be configured for one environment, groups of environments, or the whole org

TYPES OF DLP CATEGORIES

BUSINESS CONNECTORS

- Can only be used with other business connectors
- For sensitive data

NON-BUSINESS CONNECTORS

- Cannot be used with Business connectors
- For non-sensitive data
- Non-blockable Microsoft connectors can go here

BLOCKED CONNECTORS

- Cannot be used at all by anyone
- Can set this to be the default for new connectors in your default environment

So if...

SharePoint and Salesforce are in **Business**
Outlook.com is in **Non-Business**
Facebook is in **Blocked**

Connector Matrix	SharePoint	Salesforce	Outlook.com	Facebook
SharePoint	✓	✓	✗	✗
Salesforce	✓	✓	✗	✗
Outlook.com	✗	✗	✓	✗
Facebook	✗	✗	✗	✗

WHAT ARE SECURITY ROLES?

- Security roles are assigned to users based on their responsibilities and needs.
- By assigning roles, administrators can manage user privileges efficiently, ensuring that users have appropriate access to resources while safeguarding sensitive information from unauthorized access.

ALL YOU NEED

ENVIRONMENT/ SYSTEM ADMIN

Perform all administrative actions on an environment

View and manage all resources created in an environment.

ENVIRONMENT MAKER

Can create new resources associated with an environment. Need at least this to see an environment.

(apps, connections, custom APIs, gateways, and flows)

SYSTEM CUSTOMIZER

Has full permission to customize or administer the environment.

Can view all custom table data in the environment.

can only view records that they create in Account, Contact, Activity tables.

BASIC USER

Can run an app in the environment and perform common tasks on the records they own.

It has privileges to the core business tables, such as Account, Contact, and Activity.

APPROVALS USER

When users create or are assigned approvals, they are internally assigned the "Approvals User" role.

It happens automatically in Default; in others, you may need to adjust.

ALL YOU NEED

* ability to create or edit tables, relationships, fields, views, charts, dashboards in Dataverse 35

access to the environment

ENVIRONMENT/ SYSTEM ADMIN

Perform all administrative actions on an environment
View and manage all resources created in an environment.

ENVIRONMENT MAKER

Can create new resources associated with an environment. Need at least this to see an environment.
(apps, connections, custom APIs, gateways, and flows)

Without database

access to the database

SYSTEM CUSTOMIZER

Has full permission to customize* or administer the environment.
Can view all custom table data in the environment.
Can only view records that they create in Account, Contact, Activity tables.

BASIC USER

Can run an app in the environment and perform common tasks on the records they own.
It has privileges to the core business tables, such as Account, Contact, and Activity.

APPROVALS ADMIN/USER

When users create or are assigned approvals, they are internally assigned the "Approvals User" role.
It happens automatically in default, in other you may need to adjust.

With database

IMPLEMENT SECURITY GROUPS

Courtesy of Michael Roth

IMPLEMENT SECURITY GROUPS

- Security group: Ensure that users are not automatically added to an environment.
- Security roles: Restrict users from accessing resources within an environment.
- Can use M365 groups, Azure Security groups most commonly (M365 are mail-enabled)

Courtesy of Michael Roth

<https://www.michaelroth42.com/post/2022-07-03-set-up-security-groups-for-your-environments/>

WHAT EXACTLY IS THE CENTER OF EXCELLENCE (COE) STARTER KIT?

- At its essence, it's a bunch of apps and flows that other people built already for you that help you see what is going on in your Power Platform environments
 - Set up DLP permissions more easily
 - Set app and flow permissions on every app/flow in your tenant
 - Extended monitoring and visibility of makers and what they are doing in your tenant
- It comes bundled in a solution for a relatively easy install
- You can expand on the basic solution – the starter kit/core components – with add-ons

PLUS!

You can extend the CoE even further with:

- Governance components, requesting makers to justify business use cases, app quarantine and inactivity notifications
- Nurture components, sending out surveys, Training in a Day templates, newsletter capabilities
- Theming components, developing a custom theme for your org for apps
- Application Lifecycle Management components for DevOps purposes

ONLY DOWNSIDE – TAKES A WHILE TO INSTALL.

Email Makers

Compose an email to inform makers about planned upcoming changes to DLP policies that impact their apps and flows.

Action required: Upcoming data policy changes impact your Power Apps and Power Automate resources

Format / ...

We are planning changes to Power Platform data policies. You are an owner of apps and flows that are no longer compliant with the changed data policies. Review your apps and flows and take the required action within **30 days**. If no action is taken within the next 30 days, the data policy will be applied and your apps and flows will be suspended as non-compliant.

Required action:

- Delete the app or flow if you no longer need it.
- Remove the conflicting connectors from the app or flow to bring it into compliance.
- Move the app or flow to a new environment where the connector combination is allowed.

REQUIREMENTS FOR THE COE

- Licenses (the biggest hurdle for my non-profit)
 - Each acct that works with the CoE's apps needs Power App/Automate Per User license OR each separate CoE app needs Power Apps Per App license
- Admin Requirements
 - Power Apps/Automate Per User License (no trials)
 - M365 license
 - Power Platform service admin, global tenant admin, or Dynamics 365 service admin (NOT behind PIM)
 - Be mailbox enabled

COE SETUP

It's recommended that you give the CoE its own environment

(It's also recommended to have a Test CoE environment – who knew?)

When setting up the environment:

Type: Production

Create a Database?: Yes

Include Sample Apps/Data?: No

Restrict with Security Group?: No

COE SETUP

- If you are nervous about setting up the CoE, there are YouTube videos of people setting it up and going through every single step!
- There is now a Setup Wizard! Yay!
- There are usually monthly updates to deploy, but it's mostly just importing new solutions

Center of Excellence Setup Wizard

A setup wizard provides a guided step by step experience to configure the CoE Starter Kit.

Confirm pre-requisites

- Configure communication methods
- Configure mandatory settings
- Configure inventory data source
- Run setup flows
- Run inventory flows
- Share apps
- Publish Power BI dashboard
- Finish

Confirm pre-requisites

The CoE Starter Kit requires access to your tenant's Power Platform environments. Therefore, the identity you set up the CoE Starter Kit prerequisites before continuing:

Requirement	Status
Microsoft Power Platform service admin, global tenant admin, or Dynamics 365 service admin.	⚠ Verify manually
Power Apps Per User (non-trial) license	✓ Success
Microsoft 365 license	✓ Success
Power Automate Per User (non-trial) license	⚠ Fail
eMail enabled	✓ Success

TIPS AND TRICKS (AND PITFALLS)

Accelerate innovation and amplify your productivity with Power Platform

Welcome to the Power Platform communication site

You made it here and we love you for it. The Power Platform embodies our vision to empower you, and our philosophy is that we want to support citizen and team development within our tenant, meeting that goal while keeping our companies' assets safe.

Others

Hear directly from champions across our organization on how Power Platform has enabled them to work better faster and more

The screenshot shows a SharePoint site for the Power Platform communication site. At the top, there's a navigation bar with links for Home, Getting started, Help & learning, Power Platform at ASG Studio, News & success stories, Events, and Edit. Below the navigation is a search bar and a ribbon with icons for Home, Page details, and Analytics. A large banner image features three diverse individuals (two women and one man) looking at a screen together. Overlaid on the banner is the text "Accelerate innovation and amplify your productivity with Power Platform". To the right of the banner, a "Events" dropdown menu is open, showing options like "Hackathons" and "Office hours". Further down the page, there's a "Yammer Community" section with a "View all" link and a "Share thoughts, ideas, or updates" input field. On the left side, there's a sidebar with various icons and a main content area with a "Welcome to the Power Platform communication site" message and a "Others" section featuring three small images of people. The URL in the browser is https://avanadeasgstudio.sharepoint.com/sites/powerplatformhub/.

AVOID PITFALLS

1. Cleaning up can be a lot
2. Think before you click
3. Environment overload
4. Do a good job

BIGGEST TAKEAWAYS TWO YEARS LATER

- Once the governance is set up and set up right, there's not much else that you need to do on a daily basis with it other than review your dashboards (depending on size of org and adoption)
- Adoption can be a slow, but rewarding, process
- Make sure you have an open point person for makers to reach out to
